MINU MUKESH K

Data Analyst | Business Intelligence Analyst | Python Developer
minumukeshk@gmail.com | +91 83048 95515 | Kerala, India | linkedin.com/in/minumukesh | github.com/minumukeshk

PROFESSIONAL SUMMARY

MCA candidate specializing in Data Analytics and Business Intelligence, with hands-on experience in Python, SQL, Power BI, and AWS cloud analytics. Engineered a machine learning-based churn prediction model achieving 80% accuracy and 76% recall across 7,043 records, and automated ETL pipelines that reduced manual reporting effort by over 70%. Certified by AWS, Microsoft, and IBM, with applied industry project experience through TCS iON. Seeking an entry-level Data Analyst, BI Analyst, or Python Developer role to deliver actionable, data-driven business insights.

EDUCATION

Master of Computer Applications (MCA) | 2025 – Present
LEAD College (Autonomous), Palakkad, Kerala

Bachelor of Science – Computer Science | 2022 – 2025
Little Flower College (Autonomous), Guruvayur, Kerala

SKILLS

Programming & Analysis
- Python (Pandas, NumPy, Scikit-learn)
- SQL
- Data Cleaning & EDA
- Statistical Analysis & Feature Engineering

Machine Learning
- Logistic Regression, Random Forest
- Decision Tree, Predictive Modeling

BI & Visualization
- Power BI (DAX, Power Query)
- Dashboard Development & KPI Reporting

Databases
- MySQL, Google BigQuery

Tools & Platforms
- Git, GitHub, FastAPI
- MongoDB, Jupyter Notebook, VS Code

PROJECTS & INDUSTRY EXPERIENCE

Customer Churn Prediction & Retention Intelligence Dashboard
Python · Pandas · Scikit-learn · Power BI · 7,043 Telecom Customer Records
- Analyzed 7,043 telecom customer records to identify key churn drivers, enabling targeted retention campaigns for high-value segments.
- Built a classification model using Logistic Regression and Random Forest, achieving 80% accuracy and 76% recall to support proactive churn prevention.
- Developed an interactive Power BI dashboard tracking churn risk, contract mix, and revenue exposure for segment-level decision-making.

Retail Revenue & Margin Performance Analysis
Python · SQL · Excel
- Automated Python-based ETL workflows, reducing manual reporting effort by over 70% and establishing a reliable weekly data pipeline.
- Applied Pareto analysis revealing that the top 20% of products generated 80% of total revenue, informing pricing and margin strategy.
- Designed SQL-based regional scorecards to benchmark market performance and flag underperforming territories for management review.

Sales, Revenue & Business Performance Trend Analysis
Excel · Power BI · TCS iON Applied Industry Project (90 Hours) | Cert. ID: 1543-29533249-1016
- Delivered executive-ready Power BI dashboards visualizing sales trends, revenue KPIs, and performance benchmarks across business units.
- Executed end-to-end data cleaning, transformation, and analysis on transactional datasets to uncover performance gaps and revenue opportunities.
- Benchmarked business metrics against targets and presented structured recommendations that improved measurable operational outcomes.

CERTIFICATIONS

- Unlock the Power of Data with Power BI — Microsoft
- Introduction to Data Analytics — IBM
- Data Fundamentals — IBM
- Fundamentals of Analytics on AWS, Part 1 & Part 2 — AWS
- AWS Glue Getting Started | Amazon Redshift Getting Started — AWS
- TCS iON Applied Industry Project: Sales, Revenue & Business Performance Trend Analysis (90 Hrs) — TCS iON

ACHIEVEMENTS & ACTIVITIES

Hackathon Participant – GETWORK × LEAD College | 2025
- Developed two functional prototypes — Smart Token & Queue Management and DeviceTrack — within a 48-hour hackathon addressing healthcare and enterprise asset management challenges.
- Collaborated in a cross-functional team of four to design, build, and present working solutions under strict deadlines, advancing to the final evaluation round.
